WOMAN'S MEDICAL COLLEGE

OF

PENNSYLVANIA.

1871-72.
TWENTY-SECOND

ANNUAL ANNOUNCEMENT

OF THE

WOMAN'S MEDICAL COLLEGE

OF

PENNSYLVANIA,

NORTH COLLEGE AVENUE AND 22d STREET,

PHILADELPHIA.

SESSION OF 1871-72.

PHILADELPHIA:
LOAG, Printer, Sansom Street Hall
1871.
CORPORATORS.

President,
T. MORRIS PEROT.

Secretary,
C. N. PEIRCE.

Treasurer,
REDWOOD F. WARNER.

JOSEPH JEANES,
Hon. WILLIAM S. PEIRCE,
REBECCA WHITE,
DILLWYN PARRISH,
J. GIBBONS HUNT, M. D.,
EDWARD LEWIS,
JOHN LONGSTRETH,

MARMADUKE MOORE,
WILLIAM J. MULLEN,
Gen. THOMAS L. KANE,
ELI K. PRICE, Esq.,
A. J. DEBBYSHIRE,
ANN PRESTON, M. D.,
EMELINE H. CLEVELAND, M. D.,
ISRAEL H. JOHNSON.
Faculty,

ANN PRESTON, M. D.,
Professor of Physiology and Hygiene.

EMELINE H. CLEVELAND, M. D.,
Professor of Obstetrics and Diseases of Women.

MARY J. SCARLETT, M. D.,
Professor of Anatomy and Histology.

RACHEL L. BODLEY, M. L. A.,
Professor of Chemistry and Toxicology.

ISAAC COMLY, M. D.,
Professor of the Principles and Practice of Medicine.

BENJ. B. WILSON, M. D.,
Professor of the Principles and Practice of Surgery.

CHAS. HERMON THOMAS, M. D.,
Professor of Materia Medica and General Therapeutics.

HENRY HARTSHORNE, M. D.,
Professor of the Hygiene and Diseases of Children.

L. A. SANDERS, M. D.,
Demonstrator of Anatomy.

ANN PRESTON, M. D., Dean,  EMELINE H. CLEVELAND, M. D., Sec'y.
1015 Cherry Street.  1800 Mt. Vernon Street.
ANNOUNCEMENT.

1871.

The Twenty-Second Annual Session of the Woman's Medical College of Pennsylvania, will open Thursday, October 5th, 1871, and continue twenty-two weeks.

In adding two weeks to the length of the Session, the Faculty do not propose to increase the number of lectures in the regular Course, but they are so profoundly impressed with the injury, both physical and mental, done to students by crowding lectures and work upon them, that they have determined to secure to them more time for the profitable digestion and assimilation of medical knowledge. With the view also of affording students opportunities for the acquirement of more practical knowledge than can be obtained during the winter term of lectures, a Spring Course of instruction has been organized.

This Course of instruction, which will begin on Monday following the close of the Winter Session and continue ten weeks—will be reckoned to those who may avail themselves of it in addition to the regular Winter's Course of lectures, as equivalent to one year with a Preceptor.

*See Page 8.
It is not intended to employ more than three or four hours each day in these exercises; the rest of the time may be devoted to study and recreation.

The session just closed has been attended by a larger class than any preceding one. The illustration of organic tissues by the gas microscope, under the charge of that accomplished microscopist, Dr. J. Gibbons Hunt, has been a new and interesting feature in the Winter's exercises.

During the greater part of the term, the students, in addition to the clinics at the Woman's Hospital, have attended two clinical lectures weekly at the Pennsylvania Hospital. These lectures, provided for by the generosity and sense of right of the contributors and managers of that institution, have been separate from those given to male students, and have been profitable and acceptable to our class.
Clinical Instruction.

WOMAN'S HOSPITAL OF PHILADELPHIA.

The Woman's Hospital of Philadelphia, in its various departments, treats between three and four thousand patients during the year. The daily morning clinic in the Dispensary, under the immediate charge of the resident physician, is open to the students of the College, and the wards of the Hospital also furnish them many opportunities for observing the symptoms of disease and the effects of treatment.

Under appropriate direction, students are permitted to attend cases of Obstetrics in the Hospital, and at the homes of patients.

There are also clinical lectures weekly, on Diseases of Women, Surgery, General Practice, and Ophthalmology, conducted by different members of the attending Board of Physicians, who are also Professors in the College. The surgical practice of the Hospital embraces a great variety of cases, and gives the students frequent opportunities for witnessing interesting operations, and observing results.

PENNSYLVANIA HOSPITAL.

For more than a century this has been a leading clinical school whose reputation is acknowledged in Europe as well as throughout this country.
As a Hospital for general diseases it stands unexcelled, while it presents special opportunities for the study of accident cases, great numbers of which are here brought together from the factories and rail-roads of the city, as well as from the mines and furnaces of the interior of the state.

PHILADELPHIA HOSPITAL.

This is one of the largest general hospitals and most prominent clinical schools in the country: it contains over one thousand beds. Bi-weekly clinical lectures are given in the amphitheatre, illustrated from the great and varied resources of its wards. Opportunities of a high order are here afforded for the study of morbid anatomy and clinical medicine.

WILLS' OPHTHALMIC HOSPITAL.

This is one of the oldest and most important Eye Hospitals in the United States. Daily clinics are held, in which the leading operations of Ophthalmic Surgery are performed in the presence of the class, affording great facilities for improvement in this advanced specialty of medical practice.

Practical Anatomy.

The Dissecting Room, a building erected for this especial purpose, is large, well ventilated and well lighted. It is furnished with all needful appliances for effective work, and is open during the session, under the supervision of the Demonstrator of Anatomy; also during the months of April and May.

Museum.

The College Museum is well supplied with anatomical preparations, papier-maché models, and other material for illustration in the different departments of the Institution.
Library.

The large and well-selected Library of medical and other works, belonging to the Woman's Hospital, is available to the students of the College, free of expense.

Resident Hospital Students.

Several students are annually appointed from the College-Class to reside in the Woman's Hospital. These assist in the medical work of its various departments, and thus enjoy large opportunities for the observation and study of cases.

Spring Course.

This course will begin Monday, March 20th, 1871, and continue ten weeks. It will comprise weekly examinations on each of the branches taught in the College, together with special instructions in Practical Pharmacy, Surgical Anatomy and Minor Surgery, Dental Physiology, Physical Diagnosis, Diseases of the Eye, Vegetable Physiology, and the use of the Microscope. Clinical instruction will also be given several times each week, by Professors of the College and others.
Requirements for Graduation.

1. The candidate must have attained the age of twenty-one years, and must possess respectable literary attainments.

2. The candidate must have been engaged in the study of Medicine three years, and been during that time the private pupil for two years at least, of a respectable practitioner of Medicine.

(Six months spent in a hospital will be considered equivalent to one year's study under a medical practitioner.)

3. The candidate must have attended two courses of Lectures on the following subjects:

   Chemistry and Toxicology.
   Anatomy and Histology.
   Materia Medica and General Therapeutics.
   Physiology and Hygiene.
   Principles and Practice of Medicine.
   Principles and Practice of Surgery.
   Obstetrics and Diseases of Women and Children.

She must also have taken two courses of instruction in Practical Anatomy. The two courses of lectures must have been attended in different years, and one at least in this College.

4. The application for the degree must be made six weeks before the close of the session. The candidate, at the time of application, must exhibit to the Dean evidence of having com-
plied with the above requisitions: she must also present the
graduation fee, and a thesis on some medical subject of her
own composition and penmanship.*

5. In addition to the above requirements, the Faculty claim
the right to refuse examination to an applicant on the ground
of what they deem to be moral or mental unfitness for the
profession.

6. Graduates of more than five years standing of other
medical schools, approved by this, will be admitted to the lec-
tures free of expense, except the cost of the matriculation
ticket, unless they should desire to graduate, in which case
they will be expected to comply with the terms required of
second course students.

*To such students as attend three sessions or more, the option is offered of the
division of the final examination for the Degree of Doctor of Medicine as follows:

a. A first examination, which may take place after attendance upon two
courses of lectures on Chemistry, Anatomy, Physiology and Hygiene, and to in-
clude these branches: the result of which examination shall be recorded by the
Secretary of the Faculty.

b. A second examination, which may occur after the remaining requirements
of Rule Fourth (see Requirements for Graduation), shall have been fulfilled, and
which shall embrace the remaining portion of the curriculum. The result of
this second examination, added to the recorded result of the first, shall constitute
the final vote of such candidate. This second examination must take place within
three years after the record of the first examination.
The fees are as follows:

<table>
<thead>
<tr>
<th>Matriculation Ticket</th>
<th>$ 5 00</th>
<th>$ 0 00</th>
</tr>
</thead>
<tbody>
<tr>
<td>Professors' Tickets</td>
<td>105 00</td>
<td>105 00</td>
</tr>
<tr>
<td>Practical Anatomy</td>
<td>8 00</td>
<td>8 00</td>
</tr>
<tr>
<td>Graduation Fee</td>
<td></td>
<td>30 00</td>
</tr>
</tbody>
</table>

(Single Ticket, $15 00.)

No fee for Lectures after the Second Course.

Whole cost for two or more courses of Lectures and Graduation...$261 00

Each student must exhibit her tickets to the Dean within six weeks from the commencement of the Session.

For the encouragement of capable and well-educated women whose means will not allow of the usual expenditure, six students will be admitted annually, on the payment of twenty dollars for the Session—exclusive of matriculation, the demonstrator's and graduation fees. Such arrangements will be strictly confidential, and no distinction will be made in point of courtesy between the beneficiary and other students.

Ladies wishing to be received on this basis, must forward to the Dean, at least thirty days before the opening of the Session, application in their own handwriting, accompanied by satisfactory testimonials as to character, age, qualification, and want of means. The applicant must be no less than twenty, nor more than thirty-five years of age. The successful candidates will be duly notified.

It is deemed well to suggest to those ladies who may contemplate entering college, the advantage of consulting, at once, with some reliable physician, who may be able to give
systematic direction to their course of study, and furnish testimony, when required, in regard to the time in which they have been thus engaged.

Any lady who does not incline to become a physician, yet desires instruction in some of the branches taught in a Medical College, as a part of a liberal education, may take the tickets, and attend the Lectures of any one or more of the Professors.

Board can be obtained convenient to the College.

Communications should be addressed to the Secretary of the Faculty,

MRS. E. H. CLEVELAND, M. D.,
1800 Mount Vernon Street.

The following are recommended by the Faculty as Text Books and Works of Reference:

CHEMISTRY.—Fownes (edition 1869), Miller, Roscoe, Bowman’s Practical Chemistry.

PRACTICE OF MEDICINE.—Wood, Flint, Hartshorne, Da Costa.

ANATOMY.—Gray, Leidy.

OBSTETRICS.—Cazeaux, Bedford, Hodge.

DISEASES OF WOMEN.—Scanzoni, West, Hewitt, Thomas.

DISEASES OF CHILDREN.—West, Meigs.

SURGERY.—Smith’s Principles and Practice.

The Nineteenth Annual Commencement was held at Concert Hall, Philadelphia, on Wednesday, March 15th, 1871, at 12 M., when the Degree of Doctor of Medicine was conferred by the President, T. Morris Perot, Esq., upon the following named ladies:
